## Instructions

The model for Gwinevere is recommended to be stitched over 1 on 25 count fabric but you may use any count that you are comfortable with. Please use 1 strand of floss or 2 depending on your coverage preference. Charts are recommended to be stitched from page 1 top left to the last page bottom right.

If the chart contains Kreinik 032 #4 (very fine braid) we recommend that you experiment with a couple of options. Start with 1 strand of Kreinik 032 Blending Filament with one strand of white as well as trying the Very Fine Braid to determine the look that you like most.

You may also use the tent stitch or full crosses depending on your preference.

We thank you for purchasing this design and welcome any questions or comments that you may have.

Figure 1 displays a 10x10 grid of small plots, each showing the evolution of the number of nodes in a network over time. The x-axis represents time (0 to 390) and the y-axis represents the number of nodes (190 to 400). The plots show a transition from a sparse network to a dense network, with a clear change in the pattern of nodes and edges around time 200.

The figure displays a 10x100 grid of cells, with columns labeled 10 through 80 and rows labeled 570 through 600. The grid is divided into four horizontal sections by row labels 570, 580, 590, and 600. Each section contains 10 rows of data. The patterns in the cells are as follows:

- Row 570:** The first 40 columns show a solid black background. Columns 41-50 show a sparse pattern of small white circles. Columns 51-60 show a dense pattern of small white circles. Columns 61-70 show a pattern of small white circles with some larger, more complex shapes. Columns 71-80 show a pattern of small white circles with some larger, more complex shapes.
- Row 580:** The first 40 columns show a solid black background. Columns 41-50 show a sparse pattern of small white circles. Columns 51-60 show a dense pattern of small white circles. Columns 61-70 show a pattern of small white circles with some larger, more complex shapes. Columns 71-80 show a pattern of small white circles with some larger, more complex shapes.
- Row 590:** The first 40 columns show a solid black background. Columns 41-50 show a sparse pattern of small white circles. Columns 51-60 show a dense pattern of small white circles. Columns 61-70 show a pattern of small white circles with some larger, more complex shapes. Columns 71-80 show a pattern of small white circles with some larger, more complex shapes.
- Row 600:** The first 40 columns show a solid black background. Columns 41-50 show a sparse pattern of small white circles. Columns 51-60 show a dense pattern of small white circles. Columns 61-70 show a pattern of small white circles with some larger, more complex shapes. Columns 71-80 show a pattern of small white circles with some larger, more complex shapes.

Figure 1 displays a 4x16 grid of small plots, each showing the evolution of a network structure over time. The rows are labeled 570, 580, 590, and 600 on the left. The columns are labeled 80, 90, 100, 110, 120, 130, 140, and 150 at the top. Each plot shows a network of nodes (circles) and edges (lines) that changes over time, with the number of nodes increasing from left to right and top to bottom.
