### *The Medieval Town Mandala*

### *Part 7 April 2006*

OK – this is the second of four parts of Medieval buildings –this month's part is the right side. Stitch all cross stitches first.

Backstitching as follows :

**All** Backstitching lines are worked with one ply of black NPI silk – regardless which color the lines have on your chart ! ( Lines around roofs, flags on top, posts on roofs, lines around windows etc...)

Where the design is identically to the previous part stitch the same Special Stitches with the same threads.

Other then this – frame the tiny windows with the center cross on the outer side with NPI 694, one ply for a "blonde" effect ☺

Backstitch doors and window patterns in the house just left and right to the center one with one ply of NPI 915.
