Instructions

Congratulations on buying a **Heaven and Earth Designs LLC** Cross Stitch Chart . We hope it will bring you many hours of pleasurable stitching and believe the final result will be something to love and admire forever.

Included with your chart is a clear plastic bag to protect your chart, and a coded thread list for the threads you will need to complete your project. Our charts are designed to use DMC stranded cotton threads and, where appropriate, Kreinik metallic thread.

Chart Instructions:

1. This chart is made up of several numbered pages beginning at the top left corner of the first page. The pages of chart are laid out from left to right in rows e.g. 1 2 3 4, 5 6 7 8. Although each chart is marked with arrows which indicate the centre , we believe you will find it easier to begin from the top left corner of page 1 and follow the chart page by page to the bottom right corner of the last page.
2. We recommend you stitch your design on either 18 count Aida or 25 count Linen. using 2 strands of cotton over one in each case.
3. At the top of the thread list you will find our recommendation for the fabric colour. We recommend purchasing a piece of fabric that equates to the design size plus 3 inches [75mm] all around, to allow for framing and matting.
4. Because of the large number of stitches, we have found it to be easier if you stitch one 10X10 grid at a time and then continue on to the next 10 x 10 grid.
5. Stitch each page until it is completed and then move on to the next. On each page there is a number at the top left that indicates the page number. On each corner is a number in parenthesis that indicates the connecting page, unless there is not one.
6. Under International Copyright Laws, you may copy the chart for your own use. We recommend that you use a copy as your working document. You may also wish to enlarge the pages to make the symbols easier to read.

If you have any questions regarding this chart please feel free to contact us.

This figure is a detailed grid map of a coastal region, likely a bay or estuary, showing a dense network of channels and land parcels. The map is bounded by latitude 10°N to 90°N and longitude 540°E to 610°E. The grid is composed of small squares, with larger squares indicating major grid lines. The map is oriented with North at the top.

The figure displays a 10x100 grid of small plots, organized by row (290 to 380) and column (160 to 250). Each plot contains a scatter of data points, with some plots showing more dense clusters or distinct patterns than others. The plots are arranged in a grid where the x-axis represents a parameter (likely α) and the y-axis represents another parameter (likely β). The patterns of data points vary across the grid, reflecting the different combinations of parameters and the resulting model fits. The plots are arranged in a grid where the x-axis represents a parameter (likely α) and the y-axis represents another parameter (likely β). The patterns of data points vary across the grid, reflecting the different combinations of parameters and the resulting model fits.

The image displays a large grid of 1000 columns and 100 rows, organized into 10 groups of 100 columns each, labeled 310 to 380 at the top. The grid is filled with a complex, repeating pattern of symbols, including letters, numbers, and geometric shapes, arranged in a dense, grid-like fashion. The patterns are consistent across the entire grid, suggesting a highly structured and repetitive design.
