Figure 1 displays a 10x10 grid of 100 small images, arranged in 10 rows and 10 columns. The rows are labeled 670 through 760 on the left side, and the columns are labeled 310 through 350 on the top. Each small image shows a pattern of dots or pixels, which evolves from a simple, uniform grid in the top-left corner (row 670, column 310) into a highly complex, fractal-like structure in the bottom-right corner (row 760, column 350). The patterns exhibit increasing complexity and detail as they progress through the grid, with some rows showing more pronounced vertical structures and others showing more horizontal or diagonal features. The overall effect is a visual representation of a complex, self-similar pattern emerging from a simple initial state.
