Instructions

The model for Jackpot is recommended to be stitched over 1 on 25 count fabric but you may use any count that you are comfortable with. Please use 1 strand of floss or 2 depending on your coverage preference. Charts are recommended to be stitched from page 1 top left to the last page bottom right.

If the chart contains Kreinik 032 #4 (very fine braid) we recommend that you experiment with a couple of options. Start with 1 strand of Kreinik 032 Blending Filament with one strand of white as well as trying the Very Fine Braid to determine the look that you like most.

You may also use the tent stitch or full crosses depending on your preference.

We thank you for purchasing this design and welcome any questions or comments that you may have.

The image displays a 10x10 grid of 100 small, square images. Each image is a unique, stylized representation of an object or scene. The grid is organized into 10 rows and 10 columns. The objects are arranged in a way that suggests a systematic classification or categorization. The objects include various animals, plants, and inanimate objects, each presented in a unique, stylized manner. The grid is labeled with numbers 10 through 80 along the top and left edges, indicating the row and column indices. The objects are arranged in a way that suggests a systematic classification or categorization. The objects include various animals, plants, and inanimate objects, each presented in a unique, stylized manner.

[illegible]

The figure displays a 20x50 grid of small plots, totaling 1000 individual visualizations. The rows are indexed from 570 at the top to 650 at the bottom. The columns are indexed from 80 on the left to 150 on the right. Each small plot contains a unique arrangement of black dots on a white background. The patterns of dots are highly variable, ranging from sparse, isolated dots to dense, interconnected clusters and lines. The overall arrangement suggests a systematic exploration of a parameter space, with each small plot representing a specific configuration of variables. The patterns often exhibit some degree of symmetry or regularity, but these features change as one moves across the grid.
