Instructions

The model for Cute Little Fairy is recommended to be stitched over 1 on 25 count fabric but you may use any count that you are comfortable with. Please use 1 strand of floss or 2 depending on your coverage preference. Charts are recommended to be stitched from page 1 top left to the last page bottom right.

If the chart contains Kreinik 032 #4 (very fine braid) we recommend that you experiment with a couple of options. Start with 1 strand of Kreinik 032 Blending Filament with one strand of white as well as trying the Very Fine Braid to determine the look that you like most.

You may also use the tent stitch or full crosses depending on your preference.

We thank you for purchasing this design and welcome any questions or comments that you may have.

Figure 1 is a map of the North Pacific Ocean showing the distribution of 1000-m depth zooplankton biomass. The map is a 360x360 degree grid, with longitude on the x-axis (120E to 120W) and latitude on the y-axis (30N to 60N). The map is divided into a 10-degree grid. The color scale indicates biomass in g dry weight/m³, ranging from 0 to 400. The highest biomass is concentrated in the central North Pacific, around 180W, 45N, with values reaching up to 400 g dry weight/m³. The biomass decreases towards the edges of the map, with values below 100 g dry weight/m³ in the western and eastern North Pacific.
